

Sports Eyewear

Can't see playing sport?

Whether you're skiing or cycling, shooting or swimming we've got the sports eyewear for you at McCandless Opticians.

We'll also give you complete impartial advice on the best sports eyewear solution for you.

- Swimming goggles
- Squash/football protectors
- Diving masks
- Shooting glasses
- Cycling glasses

All these can be made to you prescription and many are available in childrens sizes.

Sport Vision is an area in which interest is rapidly growing. Sportsmen and women are becoming increasingly aware of the benefits of wearing eyewear whilst participating. These benefits fall into two basic categories:

1. Improving Vision. Performance is enhanced when you can see clearly. This applies firstly to spectacle and contact lens wearers whereby many goggles and frames can cater for prescriptions. Secondly, different lens tints and varying designs benefit users in many sports and weather conditions.
2. Safety. Whatever the sport, there is always a risk of eye injury. The risk in some sports, particularly squash, is substantial; the consequences often horrific. Wearing protective eyewear can eliminate this risk.

Here are some examples of our range of sports vision eyewear at McCandless Opticians

Cycling, Running, Skiing

[i826](#)
